

GLAYMAR ALBUQUERQUE DE FRANÇA

Senior Full-Stack Developer | Software Engineer | AI Specialist

glaymar2010@gmail.com • +55 83 99332-2427 • Cajazeiras, PB — Brazil

linkedin.com/in/glaymar-albuquerque • github.com/bodescorp • alttabcorp.com.br

Open to remote opportunities worldwide • Available for CLT, PJ & international contracts

PROFESSIONAL SUMMARY

Senior Full-Stack Developer and Software Engineer with **6+ years** delivering scalable systems across healthcare, education, and corporate sectors. Founder & CEO of **AlttabCorp**, a multi-vertical tech company. Specialized in **Node.js**, **TypeScript**, **React** and **React Native**, with deep expertise in cloud-native architectures (AWS, Docker), RESTful APIs, DevOps pipelines, and **AI in production** (RAG, LLM, pgvector, embeddings). Active researcher on a **FAPESQ P&D project** at LAVID/UFPB focused on public safety innovation. Pursuing three simultaneous postgraduate specializations in **Software Architecture**, **Artificial Intelligence**, and **Information Security** (2,060h). Strong track record of leading technical teams using Agile methodologies and delivering mission-critical systems under high-availability constraints.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript (4+ yrs), Python, SQL

Back-end: Node.js (6+ yrs), NestJS, Express.js, Django, RESTful APIs, Webhooks, JWT, Appwrite

Front-end & Mobile: React (4+ yrs), Next.js, React Native (3+ yrs), Tailwind CSS, HTML5, CSS3

Cloud & DevOps: AWS (S3, EC2), Docker, Docker Compose, Nginx, GitHub Actions, Azure DevOps, CI/CD, Let's Encrypt, Linux

Databases: PostgreSQL (pgvector), MongoDB, Neo4j, Redis, SQL Server, SQLite3

AI & Automation: RAG pipelines, LLM integration, Ollama, Whisper (STT), pgvector, OpenWebUI, Groq, OpenRouter, n8n, Telegram Bot API, Uptime-Kuma

Architecture & Practices: SOLID, Clean Architecture, Repository Pattern, TDD, Microservices, Scrum, Kanban

Tooling: Git, TypeORM, Knex.js, Swagger/OpenAPI, LaTeX, Godot Engine

PROFESSIONAL EXPERIENCE

LAVID / UFPB

João Pessoa, PB | Oct 2023 – Present

Systems Development Researcher — Remote

P&D FAPESQ Grant Project

- Architected and developed a **large-scale mobile device management system** using **React Native**, **TypeScript**, **Next.js** and **Appwrite**, integrated into a public safety research initiative funded by FAPESQ
- Engineered real-time IMEI tracking, **WebSocket-based push notifications** and an analytical dashboard; system deployed across field operations with high-availability requirements
- Applied **SOLID principles**, **Clean Architecture** and security best practices throughout a production-grade, peer-reviewed codebase

AlttabCorp

Cajazeiras, PB | May 2023 – Present

Founder & CEO — Software Engineer / Tech Lead

alttabcorp.com.br

- Founded and scaled a multi-vertical technology company covering **web development**, **IT consulting**, **3D manufacturing** and game development — operating **6+ active digital platforms** built entirely in-house
- Designed and maintained CI/CD infrastructure via **GitHub Actions**, **Docker** + **Nginx** and VPS deployment; reduced deployment cycle time from hours to minutes
- Delivered full-cycle technical consulting engagements: system architecture, RESTful API design, technical documentation (LaTeX/Markdown) and cloud infrastructure setup
- Built a **production RAG pipeline** on local infrastructure: Ollama LLM, PostgreSQL + pgvector, Whisper STT, n8n automation and Telegram Bot integration — zero cloud inference cost

Life Tecnologia e Consultoria

Cajazeiras, PB | Jan 2023 – Present

IT Support Technician N1/N2 — On-site

Hospital Universitário Júlio Bandeira (HUJB/Ebserh)

- Maintained **critical hospital IT infrastructure** with strict SLA compliance in a regulated Ebserh environment, supporting clinical systems **SEI**, **AGHU** and **PACS**
- Managed network security, user provisioning and technical documentation across departments serving 300+ internal users

LOOP3

Full-Stack Developer — Remote

Itapema, SC | Feb 2022 – Sep 2022

- Delivered end-to-end web and mobile applications using **Node.js**, **Express.js**, **MongoDB**, **React** and **React Native**; optimized API response times and improved frontend UX consistency
- Integrated the **Asaas payment platform via Webhooks**, automating billing workflows and reducing manual reconciliation effort
- Managed version control and release pipelines through **Azure DevOps**; applied Scrum ceremonies across a cross-functional remote team

Faculdade Santa Maria

IT Technician — Software Development & Support

Cajazeiras, PB | Sep 2021 – Feb 2023

- Developed a **student service platform** from scratch using **Node.js**, **TypeScript**, **Docker**, **AWS S3**, **PostgreSQL** and **React**, serving a user base of **500+**
- Built an Individual Work Plan (PIT) platform with **Node.js**, **SQLite3**, **SendGrid** and **React**, automating email notification workflows and eliminating manual follow-up
- Created **SQL Server analytical reports** to support strategic academic decisions for department leadership

Loopis Jr — IFPB Junior Enterprise

HR Director & Full-Stack Developer

Cajazeiras, PB | Dec 2018 – Dec 2021

Hybrid · Part-time

- Led a technical team of **15+ developers**, introducing Scrum ceremonies, code review practices and documentation standards that improved delivery predictability
- Built web and mobile applications using **Python (Django)**, **Node.js** and **Ionic** across multiple client projects

KEY PROJECTS

RAG Pipeline — AlttabCorp

github.com/Alttabcorp

Ollama · pgvector · Whisper · n8n · Docker

- Production-grade local AI system: Ollama + Qwen2.5 LLM, PostgreSQL + pgvector vector store, Whisper speech-to-text, Telegram Bot interface, n8n workflow automation and Groq/OpenRouter API fallback — **self-hosted with zero ongoing inference cost**

Historical Inventory System (TCC)

repositorio.ifpb.edu.br

Node.js · TypeScript · Neo4j · React

- Full-stack platform for graph-based analysis of **1,000+ historical legal documents**; interactive network visualization of social and patrimonial relationships — adopted by IFPB researchers for historiographic studies

CIEC Library API

github.com/Alttabcorp

NestJS · TypeScript · Docker · Swagger · JWT

- RESTful API with modular Repository Pattern architecture, JWT authentication, role-based access control, interactive Swagger UI docs and full Docker Compose containerization

IFPB Certificate Automation

github.com/bodescorp

Python · Django · JavaScript

- Automated institutional certificate issuance for IFPB Campus Cajazeiras; QR Code validation and academic system integration **reduced issuance time from hours to minutes**

EDUCATION

FAAL Educacional

Postgraduate Specialization (Lato Sensu) — Software Architecture

Brazil | In Progress

720h

FAAL Educacional

Postgraduate Specialization (Lato Sensu) — Artificial Intelligence

Brazil | In Progress

640h

FAAL Educacional

Postgraduate Specialization (Lato Sensu) — Information Security

Brazil | In Progress

700h

Combined: 2,060 hours of concurrent postgraduate coursework across three specializations.

Instituto Federal da Paraíba (IFPB)

B.Tech in Systems Analysis and Development

Cajazeiras, PB

Jan 2018 – Mar 2023

Thesis: Historical Inventory System with Neo4j — graph database for judicial document analysis; adopted by IFPB researchers

CERTIFICATIONS

- **Docker** — Containerization & DevOps (B7Web)
- **Neo4j Graph Data Science Fundamentals** (Neo4j — official)
- **Advanced Git & GitHub** (Udemy)
- **Project Management** (LinkedIn Learning)

LANGUAGES

- **Portuguese** — Native
- **English** — Intermediate (fluent technical reading, professional written communication)
